

Problem Statement: Designing Groww for the GenZ investor

Context: A large share of new investors in India today are between 20 and 26. Many are opening their first investment account. These are investors who are getting their first paycheck, working part-time, studying etc. Groww wants to serve this group best in the market.

Your task: Work on this problem statement and create a Groww App suited for GenZ users. Share your thought process through the artifacts mentioned below. Assumptions are fine as long as you state them.

Your artifacts to be submitted:

1. 1-page (~300 to 700 words) covering:
 - a. Your take on the problem statement
 - b. What is in scope
 - c. What is out of scope
 - d. What is your solution to this problem and why.
 - e. Ensure this page is not created by AI.
2. The prompts you used to create the tool
3. The evals you used to test your solution
4. Link to the app on Claude, lovable, bolt or any other tool of your choice

Please Note:

- This is only one of the many inputs we use to evaluate candidates
- You will not be evaluated on your domain knowledge
- Please ensure we have access to the tool
